1 Corpus construction
Search, screen titles, consolidate duplicate hits, and retrieve article texts
2 Structured extraction
Extract twelve SIPC fields; preserve evidence, qualifications and distinct voices
3 Source review and eligibility assessment
Assess source adequacy and educational futurity separately; recover incomplete sources where possible
4 Codebook development
Develop field categories from the full extraction corpus; review definitions and freeze the codebook
5 Account-level coding
Apply the codebook to attributed future accounts; retain primary and secondary positions
6 Review and validation
Check coverage, evidence, attribution and account consistency; document amendments to affected records
Re-extract recovered texts
Correct affected records
Interpretation of educational futures
Examine links among purposes, roles, evaluations and actor positions
Descriptive outlet comparison
Compare constituent patterns; examine composition and sensitivity
Dashed arrows indicate targeted re-extraction or correction.
